

Please note: Win Rate is a new addition. "no data" means there isn't enough data in the database to give a win rate. This will change as time progresses.

Data not provided for races at 9 furlongs (or longer) or for races under 5 furlongs.

If "0 0 0" is listed for pace numbers, data is unavailable. Same for "no data".

Turf Report: take note of first time starters with turf pedigree. Also take note of horses with turf pedigree who are returning to grass after racing on dirt/synthetic.

There are primarily 3 pace scenarios:

- 1) Fast to the ½ mile and then slow
- 2) Slow to the ½ mile and then fast
- 3) Evenly distributed pace throughout the race

My pace numbers are designed to reveal the different pace scenarios and help you spot potential winners that you might otherwise ignore.

4f Pace – This is a pace measurement for each horse based on the first 4 furlongs of the previous race.

Late Pace – This is a pace measurement for the remaining portion of the race after the ½ mile time.

Combined – This is a direct comparison of each horse against the others. The higher the number the better.

Class drop – the arrow indicates a significant class drop (minor class drops usually won't be noted).

Win Rate – This percentage is based on the pattern of the horse itself. I currently track over 200 patterns based on surface switches, distance switches, and previous race pace. It's important to remember that the Win Rate percentage is based on the pattern and **not the horse.**

The Win Rate is only shown for 4 horses. The Win Rate is based on pace ranking (both early and late) for each horse in the current field. All scratches will (obviously) improve the Win Rate for other horses in the race, particularly the first 2 early pace horses and the 2 highest late pace horses.

Things to note:

The 4f Pace and the Late Pace can be compared against each other.

The Combined number can only be compared against combined numbers. Always respect horses with the highest combined number even if their 4F Pace or the Late Pace numbers are low.

Horses with the highest pace numbers (either 4F Pace or Late Pace) should always be respected regardless of their other numbers. Example: In a 6 furlong dirt race, the fastest early pace horse has a 100 pace rating. Its Late Pace number is only a 25, and its combined number is a 12. Its Late Pace and Combined numbers are dismal compared to every other horse in the field. Should you ignore this horse? Never! This is one of the types of horses that will win wire-to-wire at a big price. If a horse has the highest early pace you should always consider it for the win slot.

Please check program numbers and pace highlights for accuracy.
